

# POWERVAULT

TRANSFORMING ENERGY USE

## THE P5 SAFETY FEATURES

- Each battery module contains a fire suppression device.
- The Powervault smartbridge continuously monitors temperatures, voltages and currents within the pack for additional safety protection, to enable shutdown of the unit down in the event of an issue.
- For indoor units, the Powervault also monitors for VOCs (volatile organic compounds) which can be an early sign of battery failure.
- The Powervault is CE marked. It complies with the energy storage system standard IEC 62933-5-1. The battery complies with safety standards IEC 61629:2022.
- The unit is compliant with the fire safety standard PAS63100:2024 (provided it is installed in accordance with the manual and the standard).
